

THE BROWNING SCHOOL
1 8 8 8

Dear Browning Families:

As we have emerged from the crisis phase of the pandemic, we have been pleased that the 2022 - 2023 school year has marked the return to the normal rhythms of student life and that we are able to resume many important community traditions. It is with that in mind that we plan for the 2023 - 2024 school year.

The Board of Trustees has set school-wide tuition at \$62,500 for the 2023 - 2024 academic year. Doing this enables us to acknowledge our accomplished and committed faculty and staff for going above and beyond in support of boys' education, and promote their continued professional development in research-based practices that ensure that each boy receives the outstanding liberal arts education for which Browning has always been known.

We do not take your continued commitment to the Browning School lightly. As a school that is built on relationships, the ones we have with families help form a community that develops men who lead lives of purpose. The ways in which our community has remained steadfastly in support of Browning's mission have allowed it to provide a strong foundation for those in our care. We are gratified to have partnered with your family on this journey and delighted to have your boys join us again next year.

Sincerely yours,

Valda Witt
President, Board of Trustees

John M. Botti
Head of School
