## **Magnus Student Medical Records**

Dear Incoming Browning families:

Welcome to Browning! I hope this email finds your family healthy.

As some of you may have already scheduled an annual physical for your child, we want to let you know that the Magnus Student Medical Records portal is open for you to complete requirements for the 2024-2025 school year. You can access your Magnus account through the [Parent Portal](#).

There you will find all of the health forms that you will need for your child, including forms for physicals, immunizations, and medication administration. The portal also includes several other necessary forms including a Vital Health Record which will require you to designate your emergency contacts. While it will take you about 20 minutes to go through the process of completing and uploading the forms during your son's first year here, much of the basic information you submit will carry over to next year and the process will then be much shorter.

Please note that you will be able to find the forms that you need for your child's physical, or other forms that require a physician's signature, and print them directly from the portal. We recommend that you submit these records using your computer rather than a phone.

All health forms must be submitted directly by parents via the Magnus Student Medical Records portal or faxed directly to Magnus. Due to HIPAA privacy laws individually emailed forms cannot be uploaded by the school on the parent's behalf.

If you have technical questions related to the Magnus portal, please contact Aaron Grill, Director of Technology. Or reach out to Magnus directly at 877-461-6831. If you have medical or health questions, please contact Roshann Vasquez, School Nurse. Thank you for helping us keep your boys healthy and safe while in school.
